Mahmoud Adel

Frontend Developer (React Js - React Native)
Cairo, Egypt | +20 1098337611 | mrmahmoudadel1996@gmail.com | LinkedIn

Military Status: Completed

🚀 Professional Summary

Experienced Frontend Developer with 4+ years of expertise in React.js and React Native development. Specialized in building responsive web applications and cross-platform mobile solutions across various industries including healthcare, e-commerce, and fintech. Proven track record in delivering scalable applications with modern technologies and best practices.

💼 Work Experience

Software Developer – Ejada (React Js, React Native)

Cairo, Egypt | Aug 2022 – Present

- Developed and maintained React Native mobile applications for major financial institutions

AlRajhi Capital Mobile App

- Built comprehensive financial mobile application from scratch using React Native
- Collaborated with development team on both UI design and core functionality implementation
- Technologies: React Native, React Query, TypeScript
- Features: Investment portfolio management, real-time market data, secure transactions
- Google Play Store | Apple App Store

AlRajhi Bank Retail App

- Enhanced and maintained consumer banking mobile application
- Implemented complex UI components and banking functionality features with Redux and custom hooks
- Technologies: React Native, Redux, Custom Hooks
- Features: Account management, money transfers, bill payments, mobile banking services
- Google Play Store | Apple App Store

AlRajhi Bank Business App

- Contributed to development with focus on UI/UX and functionality for corporate clients
- Developed business banking solution with enterprise-level UI/UX and advanced functionality

- Technologies: React Native, Redux, Custom Components
- Collaborated with cross-functional teams to deliver high-quality financial mobile solutions
- Implemented responsive designs and optimized application performance for banking sector
- Features: Corporate account management, bulk transfers
- Google Play Store | Apple App Store

Frontend Developer – Atpvital Solution (React Js)

Remote | Apr 2021 – Jul 2022

- Built responsive web applications using React.js and modern frontend technologies
- Developed NaturalInfinity project with focus on user experience and performance
- Implemented state management solutions using Redux and React Hooks
- Collaborated with design team to translate mockups into functional interfaces

CELEMI Sustainability Project

- Developed sustainability simulation platform that helps teams move towards responsible business practices by exploring successful methods to balance profit and sustainability
- Celemi delivers immersive, collaborative, and engaging business simulation games that empower your team members and leaders with enhanced knowledge, skills
- CELEMI Sustainability

Agile Move Project

- Our agile mindset simulation training helps teams stay responsive to market changes, collaborate more effectively, and improve overall efficiency
- CELEMI Agile Move is an agile mindset simulation that gives teams a shared understanding of what agile ways of working mean in practice
- Agile Move

Frontend Developer – Dot.jo Company (React js)

Remote | Mar 2021 – Apr 2021

- Developed frontend components using React.js and modern JavaScript
- Worked on improving user interface and user experience
- Participated in agile development processes and daily standups

Frontend Developer – Fudex Company (React Js)

Remote | Oct 2020 – Mar 2021

- Developed Fursatak recruitment management system - a comprehensive job application platform using React.js, Redux, Hooks, and Ant Design
- Implemented job posting management dashboard with real-time status tracking and application monitoring
- Built advanced filtering system for candidates (working status, age, gender, nationality, experience level, graduation date, GPA)
- Created sorting functionality (new to old, location-based, unread first, with comments first)
- Developed job details page with applicant profiles, CV viewer, and cover letter management
- Integrated RESTful APIs for seamless data flow

Frontend Developer – Pulse.doctors Project

Remote | Jan 2020 – Jun 2020

- Developed healthcare platform enabling patients to book appointments
- Built doctor dashboard for managing bookings, reviews, and availability
- Implemented real-time messaging and notification systems
- Used React.js, Redux, Hooks, Formik, and Bootstrap for development

---

🏆 Notable Projects

Checkbee App

Task management and checklist application that enables users to create and assign tasks to team members or supervisors
Provides real-time task progress alerts and notifications to both watch and phone devices
Features checklist creation and confirmation functionality for team collaboration
Technologies: Web-based task management platform
Website

E-commerce App

Built full-featured e-commerce application using Next.js and Redux
Implemented product filtering, shopping cart
Features include add to cart, remove items
Technologies: Next.js, Redux, React Hooks
Live Demo

LandingPage App

Modern responsive landing page with clean design and smooth animations
Built with Angular framework focusing on performance and user experience

Technologies: Angular, TypeScript, CSS3
Live Demo

CFin App

Business financial dashboard application that unleashes your business potential and drives everlasting impact
Provides insights about all your business financial data in a simple, intuitive dashboard
Technologies: React.js, Dashboard UI
Live Demo

HealthcarePlatform (Pulse.doctors)

Frontend App: Patient booking system with doctor search and appointment scheduling
Dashboard: Doctor management system for bookings, reviews, and availability
Technologies: React.js, Redux, Hooks, Formik, Bootstrap4
Features: Real-time updates, responsive design, secure authentication

Responsive Web Design Projects

- **Design 1:** Live Demo - Modern corporate website with responsive layout
- **Design 2:** Live Demo - E-commerce product showcase with CSS Grid
- **Design 3:** Live Demo - Portfolio website with advanced animations
- **Design 4:** Live Demo - Multi-page business website
- **Design 5:** Live Demo - Agency landing page with modern UI

Technologies: HTML5, CSS3, Sass, Bootstrap5, CSS Grid, Responsive Design
